

Proc case delivered financial and jury management applications for Ministry of Attorney General that are compliant with Government of Ontario Standards

Government of Ontario – Ministry of the Attorney General

Client since January 2006

Location: Toronto, Canada

Industry: Government

Client Overview

The Ontario Ministry of the Attorney General is responsible for the development and implementation of government policy and the operation of all provincial courts and their information systems in Ontario. Given the geographic size of the Province of Ontario as well as the diverse needs of its 12 million residents, the Ministry has to manage its information architecture tightly in order to deliver IT services to its stakeholders.

Client Objectives

The Ministry of the Attorney General is looking for an IT services supplier to deliver new applications that meet the Ministry's evolving needs. However, the supplier must deliver applications that not only meet the business requirements, but also fit smoothly into the Ministry's as well as the overall Ontario Government's information systems architecture and technologies.

Proc case Contribution

The Ministry selected Proc case Consulting from the Solutions-based Vendor of Record approved suppliers list to complete two major applications: a Financial Management Module, and the Provincial Jury management application. For both applications, Proc case worked closely with the Ministry staff to clearly understand their business and technical requirements. An additional challenge for Proc case is to integrate seamlessly with the Ministry's technology and application architecture, as per the Government of Ontario Standards.

The Financial Management Module integrates with existing Ministry applications to allow common method of payment, tracking and auditing financial transactions at all Provincial courts. Proc case provided project management and systems analysis services, using Ministry standards such as Unified Modeling Language (UML).

The Provincial Jury Application allows for the management of juror lists, travel expenses etc. for provincial court cases. The Proc case team designed and developed a secure custom, web-enabled technology solution using Oracle and IBM WebSphere application server.

Technology

Oracle database, Oracle Forms/Reports, IBM WebSphere/J2EE

Results

Proc case had successfully delivered two enterprise web-based solutions for the Ministry of Attorney General on financial transaction management and jury management. Both applications demonstrate Proc case's technical excellence in IT solutions delivery, as well as Proc case's ability to adopt the Ministry's standards.
