

Procuse has successfully implemented Oracle Financials and integrated it with Onerail's complex internet Rail reservation system

Onerail

Client since August 2000
Location: Toronto, Canada
Industry: Transportation/Distribution

Client Overview

Onerail provides advanced reservation systems and Internet distribution technology to rail operators around the world. Onerail's Orion reservation suite and Orion Select rail and tour system are the premier technologies in the passenger rail industry. These two products provide passenger rail operators and the travel industry with a flexible and modern reservations system as well as global distribution. www.onerail.com.

Client Objectives

Onerail had developed an innovative business strategy in Australia, and came to Canada to set up a Canadian office for internet rail reservations. They needed a Canadian Partner to implement an Oracle financial system for operational and reporting purposes, and integrate it with their reservation systems.

Procuse Contribution

The Procuse team developed a detailed understanding Onerail's complex business process and implemented Oracle Financials to best suit their needs. Procuse also integrated the Oracle Financials with Onerail's internet rail reservation system.

Technology

Oracle ERP

Results

Procuse Consulting has played a significant role in the strategic redesign of major Information systems at Onerail. Procuse is a trusted partner, bringing an understanding of business processes and technical excellence to bear on complex systems.
