

## **CGU Insurance**

CGU Group Canada Ltd. is one of the leading property and casualty insurance groups in Canada, with annual written premiums in excess of \$2.0 billion. The company is a wholly-owned subsidiary of UK-based Aviva plc, one of the world's largest insurance groups. CGU Group Canada Ltd. was formed in the late 1990s by the mergers of The General Accident Assurance Company of Canada, Commercial Union and Canadian General Insurance Company.

Procace Consulting was retained in 2001 to perform a complete analysis of CGU's requirements for a new Oracle 11i financial application, and detailed financial analysis tools. The resulting study included a complete project plan and budgetary analysis to implement corporate financial systems, modeled after the UK head office application. The study has been presented to the executive and is currently pending approval. The Study was completed on time and on budget, and CGU Insurance is completely satisfied with Procace Consulting's efforts.
