

Procase Press Release Education Funding Information System Launch

Toronto – October 24, 2002

Procase Consulting Inc. is proud to announce the launch of a major web application for the Government of Ontario, Ministry of Education, Education Funding Information System (EFIS). This application is part of a larger ministry initiative to bring standardization and accountability to the funding of school boards across Ontario. The ministry of education is responsible for funding 72 separate school boards across Ontario. These include primary and secondary, English and French, Catholic and public boards, each with its own specific needs.

Procase Consulting built the EFIS application in close collaboration with ministry experts. The innovative design combines the benefits of a spreadsheet look and feel, with powerful information storage capabilities of an Oracle database. The application design has been nominated for the amethyst award for best Web site within the Government of Ontario.

The EFIS application allows each school board, with its own needs and issues, to do funding calculations based on “What if” scenarios against the ministry funding formulas. The boards can then submit a final application for funding based on their specific programs.

Procase Consulting specializes in delivering enterprise web solutions and database applications using Oracle, Microsoft, and Java technologies.
